Business Requirements Document (BRD) – Book Vault Dashboard

1) Document Contro

Date- 14-08-2025
Author - Abhiraj Sinha
Description - Initial Draft

2) Project Overview

A modern, responsive web application for discovering, tracking, nd organizing your books.

Now, bibliophiles have their bookshelves in their pockets.

3) Scope

- Home, cart search, light, and dark mode
- User registration and login gateway
- Responsive design for mobile and desktop
- Basic SEO setup.

4) Out of Scope

- Payment gateway integration.
- Multi-Lingual Support.
- AI-chatbox Integration
- Advance SEO automation

5) Boundaries

- Data will be provided by the client
- Hoisting/Server setup is handled by the IT team

- Content/Images provided by their marketing Team

6) Functional Requirements (FRIs)
FR1 - User can sign up with Google, Yahoo, Twitter
FR2 - User can add another account.
FR3 - Book recommendation according to books liked/in cart
FR4 - Summary of the book should pop up when clicked
FR5 - Can link through Amazon and Flipkart to see prices.

7) Non-Functional Requirements (NFRIs)
NFR1 - Website should log in in 5 sec
NFR2 - Secure login with an encrypted Password.
NFR3 - Mobile responsive(foldable mobiles).

8) User stories
- **As a Visitor -** I want to view the homepage so I can learn about the website.
- **As a User,** I would like to add more font families.

9) Acceptance Criteria
- Registration is working perfectly.
- Client loves the drag to the top Button.
- Liked/Cart books are not coming in recommendations, that's good.

"This document outlines the business objectives and requirements for the project. Once approved, it will guide the design and development teams to deliver a solution that meets stakeholder expectations."
